(Unit: 100 million yen)

<u>y</u>===

Semiconductors/Devices:

Hovering around 14 billion yen in all quarters without significant fluctuations

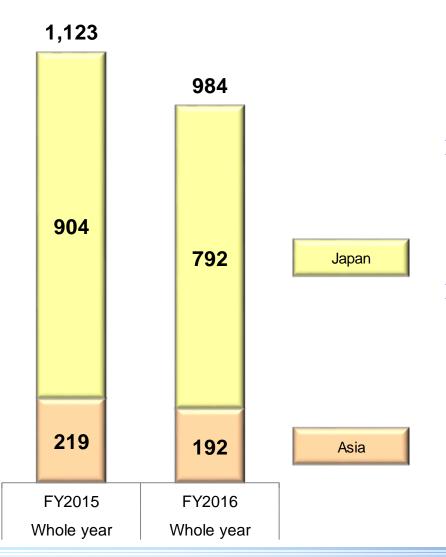

> <u>ICT/Solution:</u>

Increased from Q3 to Q4 in all segments and the total sales were also second highest in the past three years

UI-I-

(Unit: 100 million yen)

Decline in both Japan and Asia

Japan :

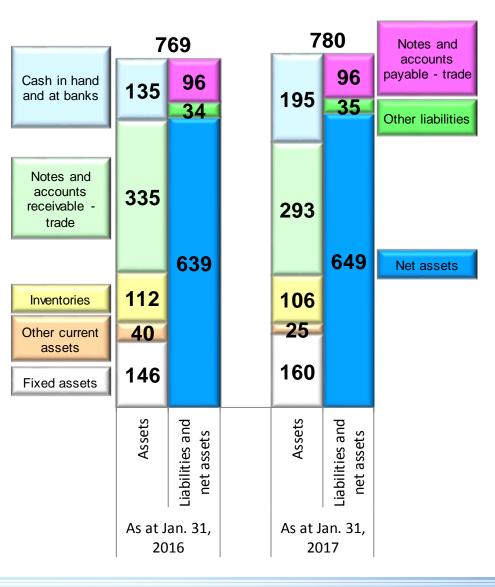

Mainly affected by the end of some large-volume transactions, but the semiconductors/devices segment are by and large in a slump

Asia

(Singapore, Hong Kong, Shanghai, Bengaluru) : Decreased in products for embedded products for terminal in finance business as well as semiconductors for TVs and industrial equipment

<u>y</u>===

(Unit: 100 million yen)

Continue to maintain the strong financial position

- Cash in hand and at banks : Considerably increased due to less capital fund, despite higher dividend and payback
- Accounts receivable payable : Decreased in line with less sales
- Net assets :
 - Implemented a shares buyback in H1
 - Increased in valuation difference on available-for-sale securities
- Equity ratio : 83.1%

FY2017 Business plan

➤ Sales:

While the semiconductors/devices segment has remained sluggish, we can expect the contribution of IoT business which will be launched with a full-range scale from H2 onwards

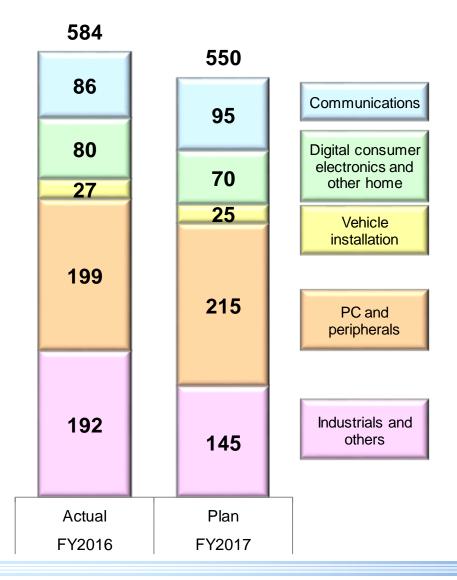

> **Operating income:**

Expected to be higher than the previous year due to an improvement of the gross profit rate contributed by IoT business which will be launched with a full-range scale which compensates higher SG&A

(Unit: 100 million yen)

-3.4 billion yen (-5.8%) over the previous year: Significant decrease in products for industrials

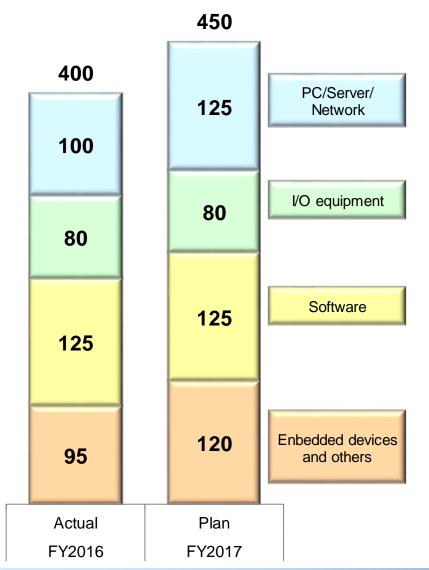

- <u>Communications:</u> Improved suppliers' yields in communication module businesses
- Digital consumer electronics and other home electronics:
 Decreased in products for TVs and game machines, our core products
- PC and peripherals: Increasing in both PCs and peripherals

Industrials and others:

Significantly decreasing due to a transfer of the distribution rights as well as production adjustments by some customers

<u>y</u>===

(Unit: 100 million yen)

+5.0 billion yen (+12.5%) over the previous year: Expected growth in IoT business

PC/Server/Network: Growing along with IoT projects

> I/O equipment:

In addition to a contribution of largevolume projects, the demand for signage-related products will be stable

Software:

The PC market is going to be bottoming out and the demand from enterprises will remain stable since FY2016

Embedded devices:

Graphic products which have advantages in terms of AI and Deep Learning will be growings

> Dividend policy:

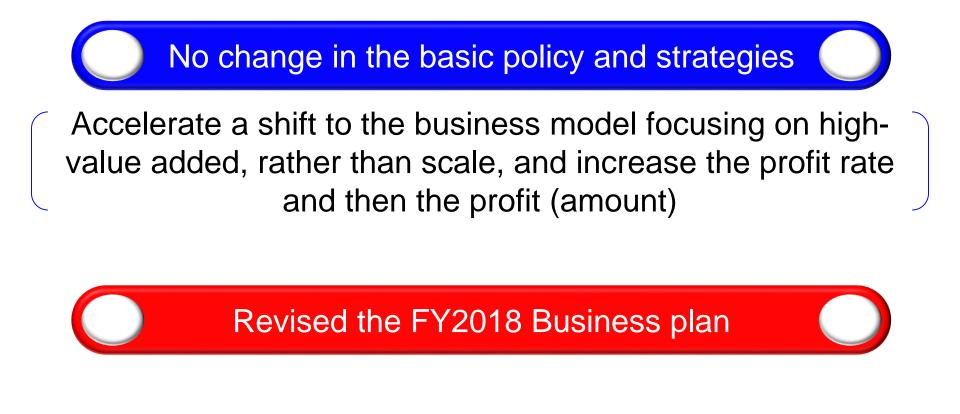

Allocation of profit earning through our business activity is one of our most important matters. While we seek to maintain the stable management base and expand business, we also seek a return for shareholders based on our financial condition and business performance.

In FY2017 and the subsequent periods, we will target 100% of the total return ratio to the profit attributable to owner of parent of each period through dividend payments and share buyback

Medium term actions

Basic policy

Contribute to customers' higher value added by creating new strengths through the IoT approach

Expand the core businesses through the IoT approach

Strategically focus investments on growing markets

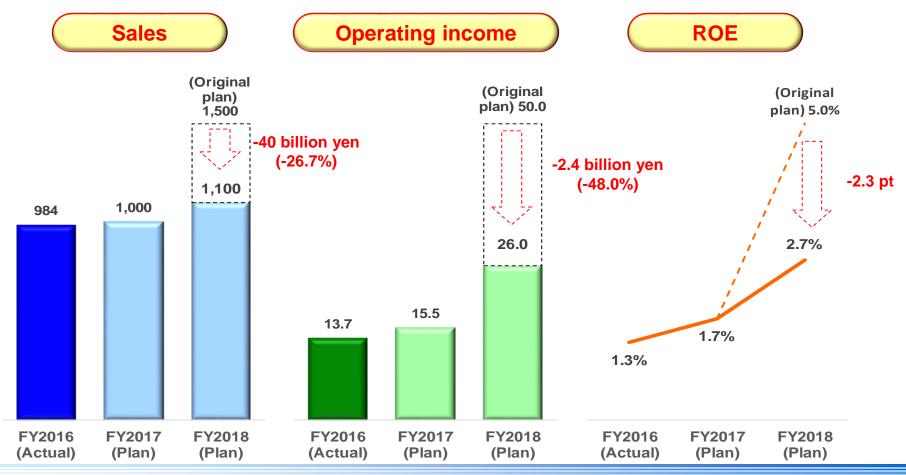

Accelerate the global strategy

Strengthen the business base for sustainable growth

Revised the targets in the medium-term business plan announced in August 2015

- Based on conservative consideration on changes in external environments and other factors -

Changes in external environments

- Japan's semiconductor market which is more serious than expected
- Increasing uncertainties in global economy (e.g. slowdown in emerging countries, political uncertainties in US and EU)
 - Breakdown of revisions of the business plan
 O Existing businesses: -28 billion yen

(Major factors)

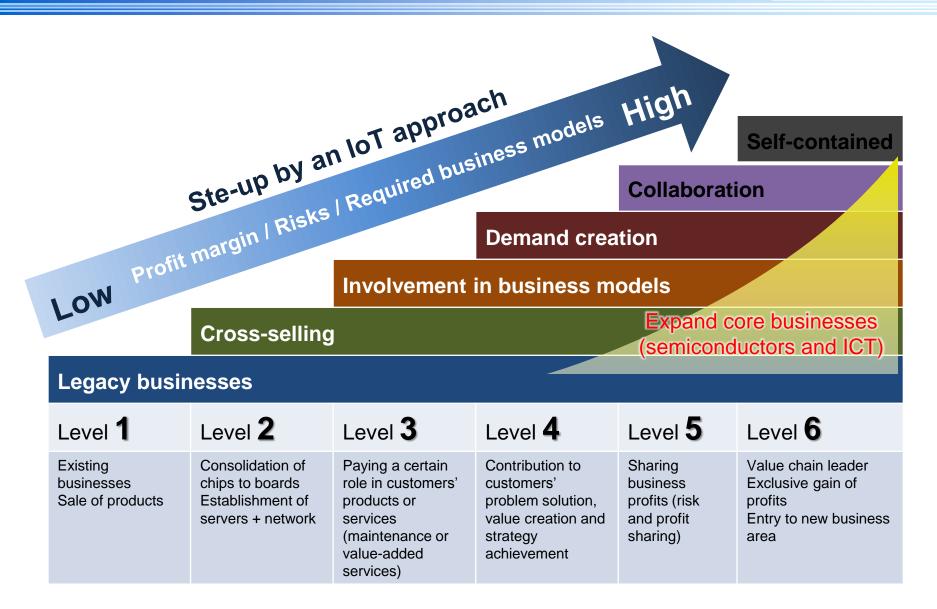

- Slump in industrials-targeted businesses mainly for China
- Transfer of the agency due to changes by semiconductor makers in their business policies
- Switching business strategies in ICT hardware business
 - Drop in product unit price, shift to cloud computing
- Strategic withdrawal from low-profitability businesses
 - Focus resources on other businesses

O IoT business:

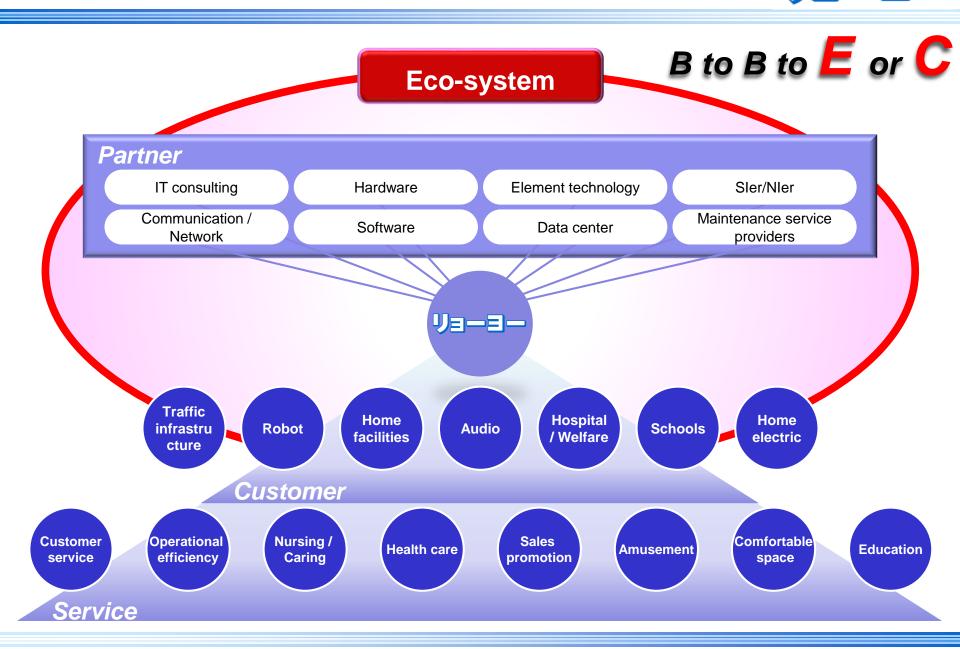

-12 billion yen

Expanding core businesses by an IoT approach

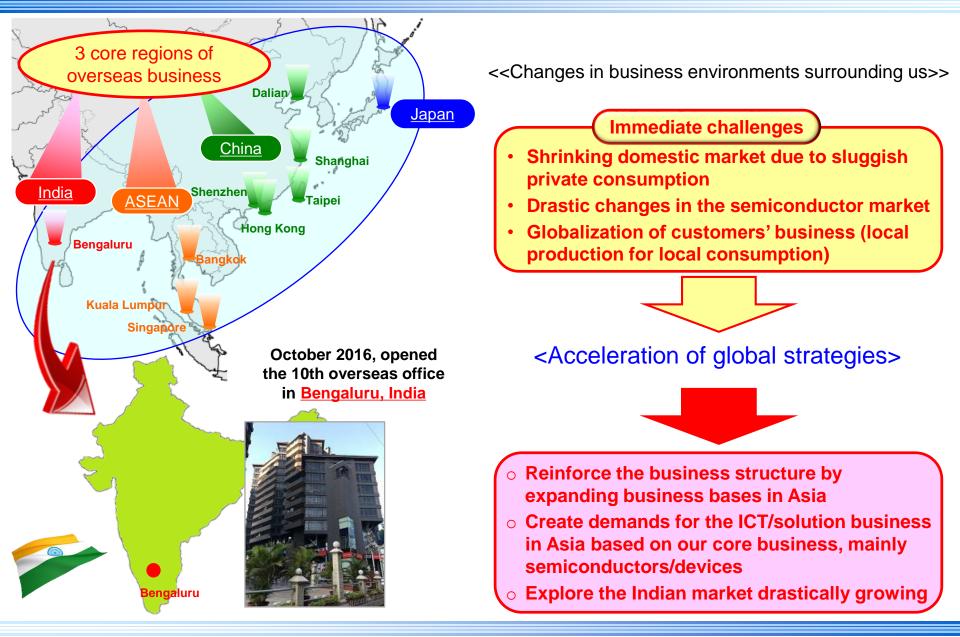

Accelerating the shift to IoT: "Customers = Partners"

Change, Challenge, Speed

Opening an office in Bengaluru, India

Return to shareholders:

Payout ratio: No change in the policy (100%) for time being

Despite the revised target ROE, keep 5% from a medium- and long-term perspective and eye further dividend increase in FY2018

≻ <u>M&A:</u>

Considering M&A to expand the IoT business, and targets include "Sler," "Nler" and "a software company"

→ Allocating "15 billion yen" to strategic investments covering FY2021

Operational reform:

As part of working style renovation, considering IT investments which contribute to better productivity per capita as well as work flow renovation and introduction of new communication tools

Basic corporate governance policy:

We are working on organization building where corporate governance is maintained effectively, recognizing that bettering corporate governance is one of the most important business issues in order to ensure health, transparent and efficient operations, maximize corporate values and subsequently contribute to the society

Summary

<FY2016 Business results>

- Sales were significantly lower than the previous year due to a prolonged slump in semiconductors/devices
- On the other hand, profits exceeded the previous year as special factors in each segment have disappeared

<FY2017 Business plan>

- Increased sales by growth in ICT which compensates a prolonged slump in semiconductors/devices
- Target an increase in profits at all levels by improving the profit rates with launch of IoT business

<Medium-term actions>

Revised the targets in the medium-term business plan (up to FY2018) announced in August 2015

Sales: 150 billion yen \rightarrow 110 billion yen, Operating income: 5.0 billion yen \rightarrow 2.6 billion yen, ROE: 5.0% \rightarrow 2.7%
